# LISTING OF SOURCES OF PUBLICATIONS.

Proceedings of meetings, symposia, etc., are included if their sources are known. A Notation of Content, *rather than the title of the publication*, appears under each corporate source. The IAA accession number is located under and to the right of the Notation of Content (for example, A63-12345), followed by a category number (for example, 13-02) for locating the abstract in the first section. The first two digits of the category number identify the issue number of *International Aerospace Abstracts*, and the two digits following the hyphen identify the category as listed in the Table of Contents.

# LISTING OF PERSONAL AUTHORS OF PUBLICATIONS.

A Notation of Content, *rather than the title of the publication*, appears under each author listing. The IAA accession number is located under and to the right of the Notation of Content (for example, A63-12345), followed by category number (for example, 13-02) for locating the abstract in the first section. The first two digits of the category number identify the issue number of *International Aerospace Abstracts*, and the two digits following the hyphen identify the category as listed in the Table of Contents.
